

# Ancient Greek pottery workshop

What were Ancient Greek pots used for?  
How has this influenced your design?

What are you going to use from your design when sculpting your pot?

Are you going to keep your design the same or change it?

*What techniques will you use to sculpt your pot?*

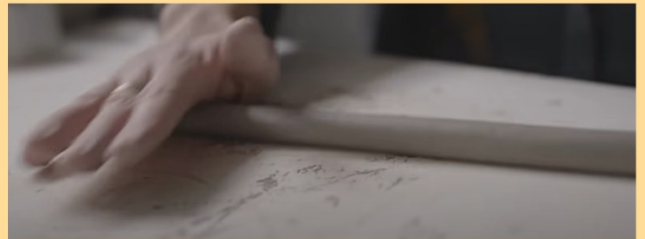

*Which tools will you use?*

1. Make a circular base.

2. Roll a piece of clay into a coil to sculpt your pot.

3. Make crosshatch marks in the base to add texture to lock the base into the coil.

4. Press the coil into the base and mould using slip and water.
